Sim Local eSIM – Quick Setup Guide (iPhone & Android)

1. *Before You Go* - Download Your eSIM

Option A: Download from the Sim Local App (All Devices)

1. Sign in to the **Sim Local app** using the same email you used to purchase your plan.

2. Go to **My eSIM** → select your plan.

3. Tap **Install Plan** → **Download Plan**.

4. Keep your screen open until the download finishes.

Option B: Download Using a QR Code (iPhone & Android)

1. Open your QR code from the Sim Local app or confirmation email.

2. On your device:

   - **iPhone:** Settings → Mobile Service (Cellular) → **Add eSIM** → **Use QR Code**

   - **Samsung:** Settings → Connections → SIM manager → **Add eSIM** → **Scan QR code**

   - **Other Android:** Settings → Network & internet → SIMs → **Add eSIM** → **Use a QR code**

3. Scan the QR code or choose it from your photo library if needed.

4. Keep the screen open while it downloads.

Option C: Manual Activation Code Entry (iPhone & Android)

1. Locate your **SM-DP+ Address** and **Activation Code** (in app or confirmation email).

2. On your device:

   - **iPhone:** Settings → Mobile Service → **Add eSIM** → **Enter Details Manually**

   - **Samsung:** Settings → Connections → SIM manager → **Add eSIM** → **Enter activation code**

   - **Other Android:** Settings → Network & internet → SIMs → **Add eSIM** → **Enter details manually**

3. Enter the codes and wait for installation to complete.

---

2. *When You Arrive* - Change Your Settings

A. Set Mobile Data to Your eSIM

Cellcom

- **iPhone:**
  Settings → Mobile Service → **Mobile Data → select your new eSIM**
  Turn **Allow Data Switching = OFF**

- **Android (all brands):**
  Go to your SIM manager settings → **Mobile Data → select your new eSIM**
  Turn **Data Switching/Automatic Data Switching = OFF**

B. Turn ON Data Roaming

- **iPhone:**
  Settings → Mobile Service → select your eSIM → **Data Roaming ON**

- **Android:**
  Option 1: Settings → … → **Mobile Networks → Data Roaming ON**
  Option 2: Open your eSIM plan → **Data Roaming ON**

C. Rename Your eSIM (Recommended)

Rename it something like **"Travel eSIM."**

- **iPhone:** Mobile Service → select plan → **Mobile Plan Label**

- **Android:** SIM manager/SIMs → select plan → **Edit / Rename**

---

3. If Your Plan Includes Calls & Texts

If your Sim Local plan supports voice/text:

- **iPhone:**
  Settings → Mobile Service → **Default Voice Line → select your travel eSIM**

- **Android:**
  SIM manager settings → under **Preferred SIMs** → set your travel eSIM for **Calls** and **Texts**

Important Reminders

- **Your eSIM may not connect until you reach your destination.**

- *When You Return*

  When your trip is over, **delete only the "Travel eSIM"** —
  NOT your Cellcom (primary) eSIM.
  Double-check by verifying:

  - The **plan name**

  - The **phone number** (your primary number stays on your Cellcom eSIM)

  - The **plan type** (travel eSIMs are often data-only)

Cellcom
